The NHS states that every woman, at some point in her life, is likely to experience PMS. Some women will experience very mild symptoms that simply act as a warning sign that her period is on its way but other women experience such extreme and debilitating symptoms that their quality of life is severely disrupted and their personal relationships are greatly affected. This book explains that PMS is simply your bodys way of letting you know that your hormones are out of balance. Author and Nutritional Therapist Susie Perry Debye explains how contributory factors such as poor diet, lack of exercise, too much stress and being overweight can all disrupt the delicate workings of your menstrual cycle.
